"The principal is puan Hajjah Latifah Hanim binti Haji Muin. She obtained her degree from Universiti Kebangsaan Malaysia and later had her diploma of education at the same universiti. She was a school teacher for a few years before she quit her job to give full attention to the growing needs of her eight children. But still a teacher at heart she just could not deny her love for teaching. Once she saw the opportunity and with the help of her husband Professor Dr. Haji Hamirdin bin Haji Ithnin, Tadika Aulad was then born in 1990."

1991-10-23: Pengumuman Pembinaan Jalan BBB-Sungai Ramal

New Straits Times - Oct 23, 1991 Browse this newspaper » Browse all newspapers »

New Bangi-Sg Ramal linkroad. makes travel to Kajang easier

THE construction of the new road linking Bandar Baru Bangi with Sungai Ramal will make it easier for the public to travel to Kajang and other parts of the Hulu Langat District.

They will also find it easier to get to the new district administrative complex in Bandar Baru Bangi. The complex is expected to be ready early next year.

The new road, about three kilometres long, will link Section 10 of Bandar Baru Bangi to the Kuala Lumpur-Seremban Highway, near the Kajang toll plaza.

It will cut the journey from Kajang to Bangi by half.

Presently, residents in various parts of the district have to travel to the junction in front of University Kebangsaan Malaysia before turning into Bandar Baru Bangi.

Hulu Langat District Officer Haji Ali Shafie said this will make it easier for residents to travel to the new office complex.

He said the opening of the new road will not only benefit Kajang residents but also those from other areas in the Hulu Langat District. Those living in Ampang can also use the Kuala Lumpur-Seremban highway to go to the new office.

Haji Ali said the District Office is negotiating with the Selangor State Development Corporation (PKNS) to purchase houses for its staff.

The new quarters will include accommodation for the District Officer, his assistants and other officers.

Haji Ali said the new District Office Complex is one of the projects for the Bandar Baru Bangi town centre.

The new office complex would provide a better working environment for employees.

The three-storey building will house the District Office and District Land Office, Drainage and Irrigation Department, Youth and Sports Department, National Unity Department, Information Office and the Social Welfare Office.

He said the present District Office Complex would be handed over to the Hulu Langat District Council.

The complex will be renovated to house all the departments of the District Council, presently scattered all over Kajang town.

Haji Ali, who is also the council president, said the centralisation of the administration under one roof will be time-saving, thus catering for better service to the public.

"The Salinger house, or Rudinara, is a single-family residence built exclusively of timber in the traditional way of the Malays. ... The Salinger house is located in an old rubber plantation in the district of Bangi, 15km south of Kuala Lumpur, off the main north-south highway. Bangi was originally an outlying area with a small rural settlement, called the Kampung Sungai Merab Luar. A university was set up, followed by a small industrial estate that lead to the slow residential development of the area. The immediate surroundings of the site consist of two to three storey, nondescript, concrete villas owned and occupied by teachers from the neighbouring religious schools and university. ... The client, Dr. Haji Rudin Salinger, is an American citizen who has lived in Malaysia for over thirty years and has a keen interest in Malay culture. Dr. Salinger and Puan Munira Salinger, his wife, wanted to build their home in the rural area near the university where he worked. They specifically wanted a modern house that reflected Malay culture and their Islamic faith." (Hana Alamuddin, May 1998:

“EPF has fully explored various strategies that further protected its role in protecting the contributions of employees. This eventually led to the management's decision that members' interests would be further enhanced through higher level of professionalism in leadership and management. Hence, the EPF decided to broaden the scope of its internal training division and to elevate its status into an actual training institution. Thus, in year 1995, the Employees Provident Fund Social Security Training Institute, otherwise known as ESSET, was born. ESSET is the acronym for EPF Social Security Training Institute. ESSET's main focus is to train and develop EPF's staff, which will lead to enhance the knowledge and skills so that they are competent to produce results expected of them to fulfill EPF's vision and mission. ... "Sekolah Kiblah merupakan sebuah Institusi Pengajian Swasta Berasrama Penuh. Pada awalnya Sekolah Kiblah beroperasi pada Januari 1993 di Tanjung Kling dengan nama Institut Kiblah, 17 Km daripada Melaka Bandaraya Bersejarah. Memulakan pengajian dengan hanya 12 orang pelajar sahaja di rumah peninggalan keluarga Allahyarham Dr Mohammad Nor, salah seorang pengasas Sekolah Kiblah dan pengasas kepada Koperasi Homeopathy Melaka Berhad. Setahun kemudian, Sekolah Kiblah telah berpindah ke Pedas, Negeri Sembilan. Pada awalnya nama Sekolah Kiblah diberi nama Kolej Kiblah. Di sinilah bakal dibina kompleks Sekolah Kiblah dengan keluasan tanah 104 ekor. Kedudukannya agak sesuai memandangkan ianya jauh daripada kesibukan bandar dan sangat dekat dengan susur keluar tol Pedas-Linggi jika melalui Lebuhraya Utara Selatan. Pihak sekolah telah membina kelas-kelas pengajian dan asrama pelajar secara berperingkat. Namun begitu, ketentuan Allah Taala mengatasi semua perancangan makhluk-Nya. Pada akhir tahun 1995, Sekolah Kiblah mula berpindah ke Sungai Merab Jaya, Bangi, Selangor. Kali ini Sekolah Kiblah menyewa satu pusat latihan bina insan yang dimiliki oleh Tn Hj Hasan bin Mukhtar. Prasarana di sini agak baik kerana susun aturnya agak menepati iklim atau suasana sebuah sekolah. Memiliki kelas-kelas pengajian yang agak selesa, dewan utama, dewan makan, asrama pelajar, pejabat dan padang bola. Kebanyakan binaan di sini diperbuat daripada kayu atau papan."
